

TEST SUMMARY REPORT (TSR)

Project: Notes Application

Prepared By: Ajinkya Sandip Ronghe

Testing Type: UI + API + E2E + Negative

Execution Date: 25/05/2026

Test Cycle: Cycle 01

Environment: QA Environment (Web UI + API)

1. Test Execution Overview

Metric	Count
Total Test Cases	23
Passed	20
Failed	3
Blocked	0
Pass Percentage	86.95%

2. Module-Wise Execution Summary

Module	Total	Passed	Failed	Blocked
UI	7	7	0	0
API	6	6	0	0
E2E	5	2	3	0
Negative	5	5	0	0

Only E2E cases failed because of UI not refreshing after API actions.

3. Defect Summary

Severity	Count
Critical	0
High	3
Medium	0
Low	0

Priority	Count
P1	3
P2	0
P3	0

All 3 defects are High severity & P1 priority.

4. Detailed Defect List

Defect ID	Module / Area	Severity	Priority	Test Case ID	Summary	Status
DEF-001	E2E – API → UI Sync	High	P1	TC-E2E-02	UI not updating after API POST (Create)	Open
DEF-002	E2E – API → UI Sync	High	P1	TC-E2E-05	UI not updating after API DELETE	Open
DEF-003	E2E – API → UI Sync	High	P1	TC-E2E-06	UI not updating after API PUT (Update)	Open

All defects have been logged with:

- Expected vs Actual results
- Steps to reproduce
- Screenshots
- Comments

5. Testing Approach Summary

Testing was performed based on:

- Approved Test Plan
- 23 test cases across UI, API, E2E, and Negative
- Requirement Traceability Matrix (RTM) ensured 100% coverage

- Actual execution recorded in Test Execution Report
- Defects logged in Defect Report with Screen Shots

Testing included:

- Functional UI testing
- REST API validation using Postman
- End-to-End flow validation
- Negative and boundary testing

6. Key Findings

1. UI module is stable

All UI test cases passed successfully.

2. API layer is working correctly

All API endpoints responded with correct data & time < 0.5 sec.

3. E2E sync issues need fixing

UI does not auto-refresh after:

- Creating note via API
- Updating note via API
- Deleting note via API

UI only reflects changes after **manual refresh**.

4. No blocking issues

Testing was completed without environment issues.

7. Risks & Dependencies

Risk	Impact	Mitigation
Missing UI auto-refresh on API actions	High	Implement real-time sync or UI refresh triggers
API → UI state mismatch	Medium	Introduce event listeners / polling

8. Final QA Recommendation

Based on current results:

Status: NOT READY FOR PRODUCTION

Application requires fixes for:

- DEF-001
- DEF-002
- DEF-003

After fixes, a **regression cycle** must be executed.

9. Approvals

Role	Name	Signature	Date
QA Engineer	Ajinkya Sandip Ronghe	ASR	25/05/2026
QA Lead	_____	_____	/ /2026
Project Manager	_____	_____	/ /2026
